SUMMARY

Computer Science postgraduate and data specialist across data science, machine learning, and computer vision. Turns complex datasets into clear, actionable strategies. Full project write-ups and code on the portfolio and GitHub above.

EXPERIENCE

Data Science Intern Turtle Down Under South Melbourne

- Automated a client-servicing system with AI agents and 5+ APIs — pipelines, dashboards, and stakeholder reports that cut manual effort ~35%.
- Aligned data workflows and automation across client-facing processes, improving service readiness and response time ~25%.

Cyber Security Consultant Practera Perth, WA

- Assessed controls against ISO 27001, Essential Eight, and SOC 2, uncovering 10+ gaps and prioritising remediation.
- Ran vulnerability assessments and penetration testing across 8+ environments; AI-powered strategies lifted risk detection coverage ~25%.

Computer Vision Intern COMVIVA Technologies Bengaluru, India

- Engineered a semantic object-detection system (CNNs, OpenCV) reaching 89% accuracy across test and real-world images.
- Improved detection performance 11% via code and data-processing prioritisation; briefed senior leadership across 5+ reviews.

System Administrator ICRIS Pareeksha Bengaluru, India

- Upgraded infrastructure across hardware, networks, and peripherals for 100+ users; increased uptime ~20% and cut resolution time ~30%.

SKILLS

Machine Learning & AI: Deep Learning, Neural Networks, TensorFlow, Keras, Scikit-learn, Computer Vision, Clustering, Ensemble Learning

Data & Statistics: Python, R, SQL, Excel Analytics, SAS Miner, Hypothesis Testing, Sampling, Spatial Analysis

Visualisation & BI: Tableau, Power BI, SAS Viya, ggplot2, SPSS

Libraries: Pandas, NumPy, Matplotlib, Seaborn, OpenCV

SELECTED PROJECTS

AI-Powered Pest Detection— CNN classifier on 75k images, ~88% accuracy; treatment recommendations improving crop-protection precision ~25%.

Dev-Pulse — Mac Hardware Monitor— Real-time Apple Silicon (M2 Max) telemetry dashboard; live CPU/GPU tracking (Python, Streamlit).

Payroll Management System— Secure web payroll with role-based auth and encryption; cut manual effort ~50%.

EDUCATION & CERTIFICATIONS

Master of Data Science (Artificial Intelligence)

La Trobe University

Bachelor of Engineering, Computer Science & Engineering

Visvesvaraya Technological University

Google AI for Professionals

Google
